<div class="page__content">
  <p>Final semester master student at TU Munich. I did my thesis at the
  <a href="https://db.in.tum.de/">Chair for Database Systems</a> under the
  supervision of Altan Birlir and Prof. Thomas Neumann, on Multi-Join
  Cardinality Estimation using Sketches.</p>
  <p>Outside of databases, my interests are mainly surrounding
  mathematics (concentration bounds, knot theory, algorithmic complexity)
  and materials science (crystallography, materials design, desert sand
  beneficiation). I'm always open to collaborating on interesting
  projects, please feel free to reach out for a chat.</p>
